CITY OF JOLIET

September 12, 2024
Ottawa St. Parking Deck Access and Revenue Controls System Replacement
Addendum No. 2

ADDENDUM NO. 2

CONTRACT 2861-1024

OTTAWA ST. PARKING DECK ACCESS CONTROL AND REVENUE CONTROLS SYSTEM REPLACEMENT

The attention of all prospective bidders on the above referenced project is called to the following listed modification in the contract documents:

1. **The implementation timeline in the Project Schedule in Appendix C.** We would anticipate the vendors to provide their recommended implementation plans for installation of the parking equipment (including phasing) to ensure continuous operation of the garage while the parking equipment is installed.

2. **The Exit Island design** We anticipate the vendor including and providing the island designs most conducive to the protection (necessary protective bollards) and the sustainable operation of their proposed equipment solutions.

3. **Exit Gate location on sketch.** The provided sketch shows all gates placed within the garage. We plan to keep the gate location in the interior we believe this will extend their service life due to limited exposure to weather. A gate is not required to be installed by the existing cahier booth

4. **Concrete Work Requirements.** Design specifications are shown in RFP in appendix A.

5. **VMS sign location on sketch.** The exterior VMS sign location is not confirmed at this time, the final location will be coordinated with City staff at the time of installation.

6. **VMS sign specifications** are provided in sections 2.12 and 2.13. Please provide any variances to the specifications.

7. **The cashier station** will no longer be used and may remain in place However, we would still like a cost for removal.

8. **Mobile Payment.** The Ottawa Street Parking Deck does not have a mobile payment option. The City of Joliet does use Passport Parking for mobile payment in the commuter parking lots. We encourage the vendors to propose mobile fee computer solutions

integrated with their proposed system that provide enhanced service and flexibility to the operation.

9. **Current Operations.** There is no Parking Access Control System at the parking deck. The City does currently issue quarterly passes for the parking deck. The passes are manually distributed hang tags.

10. **Pay-on-Foot Pay Station**. Include any recommendations for POF placement in your proposal. These details can be coordinated once a vender is selected.

11. The City is requesting a **cloud based system**. Please provide details to any variances to this type of system. The City will provide the intermediary network internet connection to the parking deck for the cloud server connectivity and remote access. A fiber connection will eventually be installed. The City will not be providing any additional or redundant network connections.

12. **IT room**. The rack in the IT room referenced at the walk-through meeting will be for the City of Joliet's temporary internet connection.

Please note: all addendums are to be acknowledged on the outside of your bid/proposal package.
